

CRUNCH PAYMENTS

HELLO!

WE'RE

CRUNCH PAYMENTS

Crunch Payments are specialist providers of card and payment products to cutting-edge companies.

PAYROLL CARDS

PAYING YOUR TEMPORARY EMPLOYEES

ACCURATELY AND SIMPLY PAY YOUR WORKFORCE

As an employer of overseas employees you will undoubtedly understand the struggles they can face when opening up a UK bank account.

Equally, paying your employees via cash is an administrative nightmare and difficult to distribute correctly.

With The Crunch Payroll Card, we provide you with a simple and effective way to instantly issue cards, manage salaries and pay your temporary employees.

HOW DOES THIS WORK?

Using the Crunch Payroll management platform, you can give your seasonal employees a prepaid card to receive their salary. They don't need to be a permanent resident in the UK, and they don't need a bank account.

You can store empty cards on your premises and issue them instantly to new employees. Or if you're rolling the service out to your entire workforce you can issue 10 to 10,000 cards at the click of a button.

Payroll transfers are done via BACS and you'll have full visibility on who has been paid and when.

Your employees have instant access to their money, without any of the hassle of cash. And you can even pay bonuses onto the cards!

WHY LAUNCH WITH CRUNCH?

Instant Access to funds:

Our prepaid cards offer an accessible alternative to conventional debit or credit cards as they don't require a bank account or credit check.

Users can access and spend their funds as soon as their card is registered and loaded through your Card Management Portal.

Instant Card Issuing:

Our non-personalised prepaid cards don't require a bank account so can be issued quickly and easily. Cards stored in your safe are ready to be registered and once loaded, the cards can be used straight away.

BENEFITS OF CRUNCH

Remote Card Management

Use our web-based Card Management Platform, or our APIs, to manage all cards remotely.

Load cards or digital wallets in real-time, change card behaviours, automate bulk payments, or replace stolen cards. Plus, users can only spend what's on the card.

Multiple Languages

Our intuitive cardholder portal and management platform come in 120+ languages.

Secondary Family Card

For employees who wish to send funds home to family overseas, Crunch can issue a secondary card, which can spend from the same card balance and allow instant access to funds – managed and allocated by the primary cardholder – remotely.
